

Online Filtering Facepiece Respirators for All Industries

Intended Audience

This introductory-level online course is appropriate for all workers and managers, supervisors, and team leaders who may be required to wear filtering facepiece respirators. Additional courses that will help deal with infectious diseases include:

- Handwashing and Illness Prevention in the Workplace for All Industries
- OSH Guidance and Regulations on Viral Exposures and Recording Workplace Exposures for All Industries

To determine if N95 and Other Filtering Facepiece Respirators Awareness for All Industries is appropriate for your training needs, please contact us.

Learning Objectives

Filtering Facepiece Respirators Awareness for All Industries helps workers who may need to wear N95 and filtering facepiece respirators:

- Recall what respirators are
- Identify the different types of respirators
- Describe filtering facepiece respirators, specifically the N95
- Identify the proper methods for putting and taking off filtering facepiece respirators
- List employer requirements

After completing the course, students will understand the different types of filtering facepiece respirators as well as best practices and proper methods for putting and taking them off.

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
