

# Online Introduction to Confined Space in Construction

## Intended Audience

This course is principally intended for employees that may have the opportunity to enter (authorized entrant), attend (attendant), or act as entry supervisors for (entry supervisor) work in confined spaces including permit-required confined spaces. The course provides on-line classroom type information surrounding the OSHA Construction requirements, confined spaces hazards, basic tools and techniques commonly used to recognize and evaluate hazards and the fundamentals of confined spaces hazard control. This online safety course is intended for those who work with tanks, silos, boilers, sewers, pipelines, ship's holds and trenches.

- Confined Space Entry Supervisor
- Confined Space Entrant Worker
- Confined Space Attendant Worker

## This Course is Based on:

OSHA's Confined Space in Construction Standard as found in 29 CFR 1926 Subpart AA.

## Learning Objectives

This Introduction to Confined Space in Construction online safety course will explain the scope, definitions, requirements, processes and permits, training, duties of confined spaces personnel, rescue and employee participation requirements. Case studies and interactive exercises are designed to support student learning. Upon successful completion of this course, you will:

- Recognize requirements of the OSHA Confined Space in Construction Standard, 29 CFR 1926, Subpart AA (effective August 3, 2015)

- Identify hazards typical to confined spaces, how they are recognized and evaluated, and ways these hazards are controlled
- Recognize components of the confined space permit process
- Identify duties of individual confined space team members
- Recognize the dangers of entry rescues and the preparations required for making a rescue
- Recognize basic employer requirements for protecting workers from exposure to confined space entry hazards

### Course Topics

- Introduction to Confined Space
- Confined Spaces in Construction Standard
- Definitions
- General Requirements
- Confined Space Safe Working Practices
- Permit-required Confined Space Entry (CSE)
- CSE Equipment
- Duties of the CSE Team
- Rescue from Confined Space
- Special Considerations
