

Online Introduction to NFPA 70E (2018) for All Industries

Intended Audience

This online safety course is for those who work around potential workplace electrical hazards, in all industries:

- Workers (including workers whose exposure may not be part of their regular job responsibilities)
- Electricians
- Supervisors
- Managers

Learning Objectives

The topics covered in this course include identification of and protection from electrical safety hazards leading to arc flash, and how to establish an electrically safe work condition as outlined in the NFPA 70E standard, updated in 2018.

Specifically, the student will be able to:

1. Recognize the history and purpose of the National Fire Protection Association (NFPA) and the 2018 NFPA 70E standard
2. Identify responsibilities and training requirements for Qualified and Un-qualified persons
3. Recognize what is required to achieve an electrically safe work condition through an effective safety program
4. Identify safeguards and controls for work involving electrical hazards, including the use of personal protective equipment, labels, warnings, and barricades
5. Identify host employer and contractor responsibilities required by NFPA 70E
