

Online Housekeeping Awareness for Construction

Intended Audience

This online safety course is for all workers and management at a construction office or work site.

- Construction Workers
- Construction Foremen
- Construction Supervisors

Learning Objectives

While completing this online safety course, you will learn about preventing housekeeping hazards by recognizing and controlling them. The material covered in this course could also be applied to an industrial housekeeping safety program. OSHA regulations require providing containers for refuse, removing waste and debris regularly, removing combustibles and flammable waste material frequently and other activities to prevent hazards.

Course Topics

- Introduction to Housekeeping
- OSHA Regulations
- Housekeeping Hazards
- Housekeeping Hazard Control
- Situational Analysis

Elk Environmental Services is partnered with Clicksafety to give our clients quality online training.
