

Online Personal Protective Equipment for General Industry

Intended Audience

This Personal Protective Equipment training is geared towards employees, workers, supervisors and managers in the General Industry, Construction, Maritime and Agriculture industries, but is relevant for anyone who uses, selects, maintains or inspects PPE.

- Manufacturing
- Warehousing and Distribution
- Property Management
- Construction
- Retail Services
- Healthcare
- Automotive, Trade and Transportation
- Hospitality

Learning Objectives

This Personal Protective Equipment (PPE) for General Industry online safety course focuses on the tools used in the workplace in order to understand the hazards that they can cause. Specifically, this presentation focuses on hazard identification, avoidance and control. You are encouraged to further your learning by reviewing OSHA's Standard on Personal Protective Equipment. Specifically, Subpart I, sections 1910.34 through 1910.38 of OSHA's Occupational Safety and Health Standards for General Industry is important to review. By the end of this course, you will have been provided with the knowledge required to work safely at the job site.
