

Online 100% Fall Protection for Construction

Intended Audience

This online fall safety course will help construction workers and employees who are responsible for following OSHA and ANSI safety regulations. More specifically, this course is designed for:

- Construction Supervisors
- Construction Managers
- Safety Officers

Learning Objectives

This fall protection course focuses on fall injuries and fatalities and the definition of 100% fall protection. You will be taught the six steps of the fall protection program and how you can make the program work at your construction site. Additionally, the course covers ways to recognize, evaluate, control, and eliminate fall hazards at the job site.

Course Topics

- 100% Fall Protection Overview
- Background of Fall Protection
- 100% Fall Protection
- Hazard Assessment & Control
- Common Problems and Solutions
- Getting Started with Fall Protection
- Other 100% Fall Protection Issues
