

# Online DBCP Awareness for General Industry

## Intended Audience

The DBCP Awareness for General Industry course is designed primarily for all workers and management in the General Industry. This course will specifically benefit the following:

- General industry workers
- General industry managers
- General industry supervisors

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

## Learning Objectives

The Dibromochloropropane (DBCP) Awareness for General Industry is an introductory-level course that focuses on 1,2-Dibromo-3-Chloropropane – more commonly referred to as DBCP. This course provides an overview of DBCP as covered by Subpart Z 29 CFR 1910.1044 for General Industry. While once used as a soil fumigant and nematicide, a type of insecticide on crops, DBCP is primarily only used as an intermediate in chemical synthesis these days.

This online training discusses the common uses of DBCP, potential exposure, and its chemical properties. Designed to focus on health hazards and effects, participants will learn OSHA requirements and more.

## Course Topics

- Introduction to DBCP
- Properties of DBCP
- DBCP exposure and associated health hazards
- Safety requirements of DBCP
- Symptoms of acute and chronic exposure

Elk Environmental Services is partnered with ClickSafety to offer our clients quality online training.
