

Online Control of Hazardous Energy

Awareness for General Industry

Intended Audience

Control of Hazardous Energy (COHE): Awareness for General Industry is intended for all employers and employees who are required to adhere to COHE and LOTO standards as defined by OSHA, including:

- Managers
- Supervisors
- Workers

For additional training resources, please see our Electrical Safety and LOTO for General Industry course. To determine which courses are best suited to your needs, please contact us.

Learning Objectives

This introductory online course explains OSHA standards and best practices for employee safety in environments where hazardous energy may be present. Course topics include:

- A review of the six basic groups of hazardous energy
- OSHA standards for isolation and control of hazardous energy
- 5 elements of effective LOTO practices
- Identification of hazardous energy control protocols via COHE/LOTO programs

After taking the course, students will be prepared to recognize sources of hazardous energy, their relative risks, and the steps needed to control and isolate these hazards.

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
