

# Online Power Tool Safety Awareness for Construction

## Intended Audience

This online safety course is part of a hand and power tool safety program intended for construction workers and managers at the job site.

- Construction Workers
- Construction Foremen
- Construction Supervisors

## Learning Objectives

Power Tool Safety Awareness is an online power tool safety course regarding the dangers involved in using power tools. You will also be informed of the importance of using PPE to work safely. Hand power tool safety is important as power tools are often necessary to complete a task, yet can cause injury if not properly used and maintained.

## Course Topics

- Introduction to Power Tool Safety
- Types of Power Tools
- Final Considerations

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
