

# Online Road Construction Common Hazards for Construction

## Intended Audience

This intermediate-level online road construction safety training course is designed for individuals who work in the road construction industry, including road construction workers and supervisors, as well as employees responsible for maintaining a safe work environment per OSHA regulations for road construction safety.

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

## Learning Objectives

Road construction hazards pose unique risks to workers. Unsafe practices for mobile equipment and vehicle operation, lighting, or workplace behavior can easily result in serious injuries or even death. The Road Construction Common Hazards course helps ensure workers are prepared to recognize and avoid these hazards and keep operations compliant with OSHA CFR 1926 Safety and Health regulations, as well as all standards established by the Federal Highway Administration's (FHWA's) Manual of Uniform Traffic Control Devices (MUTCD).

## Course Topics

- Top four road hazards for construction work
- Back-overs, run-overs, and other employee hazards
- Night work safety and work area lighting
- Driver and operator safety responsibilities
- Safe use of mobile equipment

- Personal protection equipment (PPE), back-up alarms, barricades, and other safety measures
- Flagging safety

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
