

Online 13 Carcinogens Awareness for General Industry

Intended Audience

The 13 Carcinogens Awareness for General Industry course is designed for all those in the general industry sector who may be exposed to carcinogens in the workplace, or who may be held responsible for the overall safety of the jobsite in accordance with OSHA standards. Individuals who may specifically benefit from this course include the following:

- General industry workers
- General industry managers
- General industry supervisors

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

Learning Objectives

The 13 Carcinogens Awareness for General Industry online safety course is an introductory-level training designed to teach participants about the basics surrounding carcinogens, including what they are and what they can do to the human body. This course places emphasis on the need for proper carcinogen training to reduce the risk of fatal exposure while providing tools and tips in case of accidental exposure. In addition to carcinogen safety, participants can expect to learn one's right to know and the benefits of medical surveillance.

This online training is designed to identify and classify the 13 carcinogens, as well as regulations surrounding their use in the workplace. Throughout this course, participants can expect to learn what to do in case of accidental exposure.
