

Online Handwashing and Illness Prevention in the Workplace for All Industries

Intended Audience

This intermediate-level online course is appropriate for all workers and managers, supervisors, and team leaders. Additional courses that will help deal with infectious diseases include:

- N-95 and Other Filtering Facepiece Respirators Awareness for All Industries
- OSH Guidance and Regulations on Viral Exposures and Recording Workplace Exposures for All Industries

To determine if Handwashing and Illness Prevention in the Workplaces for All Industries is appropriate for your training needs, please contact us.

Learning Objectives

Handwashing and Illness Prevention in the Workplace for All Industries helps students:

- Explain the importance of handwashing to protect oneself from illness.
- Describe the highly recommended situations for handwashing.
- List the five steps recommended by the U. S. Center for Disease Control and Prevention for proper handwashing.
- Recommend hand sanitizer as an alternative to soap and water.
- List the steps of using hand sanitizer.

After completing the course, students will understand the situations where handwashing is recommended, the steps for proper handwashing, and recommendations for hand sanitizers as alternatives to handwashing.

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
