If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

Learning Objectives

The Inorganic Arsenic Awareness for General Industry course is an introductory-level training presenting the common routes and symptoms of exposure to arsenic as covered by OSHA Subpart Z 29CFR 1910.1018 for General Industry. Throughout this training, participants can expect to focus on the primary routes of exposure, symptoms of both acute and chronic exposure, OSHA's permissible exposure limits (PELs), action levels or inorganic arsenic, and the two recommended exposure controls.

This online training teaches participants essential knowledge and facts about inorganic arsenic, ensuring participants are aware that overall safety depends on both awareness and vigilance.

Course Topics

- Properties of and exposure to inorganic arsenic
- Safety requirements regarding inorganic arsenic
- Inorganic arsenic
