

Online Subpart D Occupational Health/Environmental Controls for Construction

Intended Audience

The Subpart D Occupational Health/Environmental Controls for Construction online training is designed for all construction workers and management who may be held responsible for the overall safety of the jobsite in accordance with OSHA regulations. Specific individuals who will benefit from this course include the following:

- Construction workers
- Construction managers
- Construction supervisors
- Construction foremen

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

Learning Objectives

The Subpart D Occupational Health/Environmental Controls for Construction online training is an intermediate-level safety course designed to review Occupational Health as established by OSHA Subpart D for Construction. Additionally, participants can expect to cover the requirements for medical services and first aid, sanitation, occupational noise exposure, ionizing radiation, airborne contaminants, illumination, and ventilation.

This course addresses the primary functions of hazard communication (HazCom) and how to read material safety data sheets (MSDS) as established by Subpart D. Participants can expect a thorough overview of general health and environmental requirements for construction, as well.

Course Topics

- Overview of Subpart D
- Overview of Subpart D Occupational Health Environmental Controls
- Introduction to medical services
- Sanitation
- Exposures and controls
- HazCom
