

# **Online Methylenedianiline (MDA) Awareness for General Industry**

## **Intended Audience**

The Methylenedianiline (MDA) Awareness for General Industry training is designed for anyone who may handle, work with, or come into contact with MDA. This course will specifically benefit the following:

- General industry workers
- General industry managers
- General industry supervisors

If you have any concerns as to whether this course is appropriate for you or your industry, please browse contact us.

## **Learning Objectives**

The Methylenedianiline (MDA) Awareness for General Industry course is an introductory-level training designed for all those who may work with or encounter MDA on the jobsite. MDA is an extremely hazardous chemical that must be treated with caution and requires safe work procedures and training as established by OSHA Subpart Z 29 CFR 1910.1050 for General Industry.

This online course reviews OSHA standards governing working with or around MDA, as well as the effects of both acute and chronic exposure. Furthermore, participants can expect to learn the three most common routes of exposure, medical surveillance, and monitoring.

## Course Topics

- Introduction to MDA
- Properties and effects of exposure to MDA
- Quizzes 1 & 2
- Safety requirements surrounding MDA

Elk Environmental Services is partnered with ClickSafety to offer our clients quality online training.
