

Online Subpart O Motor Vehicles, Mechanized Equipment for Construction

Intended Audience

This intermediate-level online course is intended for all individuals assigned to construction and/or marine job sites, including workers, supervisors, and managers.

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

Learning Objectives

From building roads to long-shoring operations, construction workers often rely on heavy equipment on the job site. OSHA 29 CFR 1926, Subpart O for Motor Vehicles and Mechanized Equipment, and Marine Operations addresses the dangers posed by these vehicles and machines to ensure that employees stay safe on the job when motorized equipment is required. The Subpart O: Motor Vehicles, Mechanized Equipment course explains safe work practices and regulations for motorized and heavy equipment used in construction and marine operations to help reduce risk and minimize injuries, illnesses, and fatalities.

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
