

Online MSHA Part 46 2020 Refresher

Intended Audience

This 8-hour online course is appropriate for surface miners who have completed new miner or newly employed, experienced miner training within the last 12 months, including:

- Miners
- Supervisors
- Managers
- Mine operators
- Miners' representatives
- Subcontractors

Upon completion, you will have met the MSHA Title 30, Part 46 training regulations for shell dredging and sand, gravel, surface stone, surface clay, colloidal phosphate and surface limestone mining, for 12 months. To ensure compliance, mine operators and contractors must update their MSHA Part 46 Training Plan to include ClickSafety in the annual refresher section before assigning this course.

The course should **NOT** be taken by:

- Anyone considered a new miner by MSHA standards, including individuals working in a mine for the first time and experienced miners working in a new type of mine for the first time
 - Note: ClickSafety's 4-Hour New Miner Training provides an appropriate alternative.
- Individuals seeking to fulfill MSHA Title 30, Part 48 training requirements
 - Note: For more information, please reach out to the mine operator.

Learning Objectives

In this 8-hour course, students will cover essential topics in surface mine safety and health standards, including:

- A review of the mine work environment
- Best practices for recognizing, avoiding and reporting common hazards, including electricity, hazardous energies, confined spaces and conveyors
- Fire warning signals and firefighting best practices
- Health and safety aspects of mining tasks
- Essential safety topics, including first aid, emergency medical procedures and the use of PPE (respirators and self-rescue devices)
- The dangers of silica dust and blood-borne pathogens
- Emergency situations, including escape and evacuation
- MSHA miners' rights and responsibilities
- Supervisor and representative MSHA roles and responsibilities
- Machine guarding

New for 2020 - the course now features interactive components to create a 360 degree view for hazards assessments.

NOTICE: This training is applicable only to MSHA Title 30, Part 46 regulations for sand, gravel, surface stone, surface clay, colloidal phosphate, surface limestone mines, or shell dredging. This training will not satisfy Part 48 training requirements. If you are uncertain whether you are required to have Part 46 or Part 48 training, please contact the mine(s) you are planning to enter.

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
