

# Online Vinyl Chloride Awareness for General Industry

## Intended Audience

The Vinyl Chloride Awareness for General Industry training is designed for anyone who may handle, work with, or come into contact with MDA. This course will specifically benefit the following:

- General industry workers
- General industry managers
- General industry supervisors

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

## Learning Objectives

The Vinyl Chloride Awareness for General Industry course is an introductory-level training designed to bring awareness to the potentially hazardous industrial chemical, Vinyl Chloride. Participants can expect to learn the requirements as established by OSHA Subpart Z 29 CFR 1910.1017, as well as learn about the chemical, its uses, and the permissible exposure limits (PELs). Furthermore, primary routes of exposure, as well as symptoms of both acute and chronic exposure will be discussed.

This online course teaches participants the primary uses and properties of Vinyl Chloride. Furthermore, participants can expect to learn the recommended exposure controls and the requirements for exposure monitoring, training, spillage, and storage.

## Course Topics

- Introduction to Vinyl Chloride
- Properties and exposure
- Safety requirements

Elk Environmental Services is partnered with ClickSafety to offer our clients quality online training.
