- Bloodborne Pathogens

To determine if OSH (Occupational Safety and Health) Guidance on Viral Exposure for All Industries is appropriate for your training needs, please contact us.

Learning Objectives

OSH (Occupational Safety and Health) Guidance on Viral Exposure for All Industries helps workers become familiar with basic occupational safety and health principles and techniques related to epidemic and pandemic outbreak awareness and will be able to:

- Describe what viral and microbial and microbial exposures are.
- Examine the most applicable OSHA standards for identifying viral and microbial and microbial exposures in the workplace.
- Examine current OSHA standards for recording and reporting viral and microbial exposures in the workplace.
- Identify sources of information and assistance for viral and microbial exposure.

After completing the course, students will understand the different techniques that can be used to help keep workers safe in epidemic and pandemic outbreak situations.

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
