

Online Annual HAZWOPER Refresher

Intended Audience

The Annual HAZWOPER Refresher (8-Hour) course is ideal for employees, managers, and supervisors of all level who may be exposed or potentially exposed to hazardous substances while on the job; the course is also ideal for those who have already taken their 24-hour or 40-hour HAZWOPER certification training. Individuals who may specifically benefit from this course include the following:

- Workers involved in mandatory or voluntary clean-up operations
- Workers involved in corrective actions involving clean-up operations
- Workers involved in operations involving hazardous waste
- Workers involved in emergency response operations
- Utility and other contractors and subcontractor workers who perform duties at a hazardous waste site
- On-Site Supervisors and Managers

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

Learning Objectives

The Annual HAZWOPER Refresher (8-Hour) course is an advanced certificate/card-level training designed to provide essential knowledge and training as prescribed by the OSHA standard for hazardous waste operations and emergency response (HAZWOPER) in 29 CFR 1910.120. All levels of employment are required to have eight hours of training annually. This specific training helps participants review basic occupation safety and health principles during their initial 24-hour or 40-hour certification training.

Course Topics

ClickSafety's Annual HAZWOPER Refresher (8-Hour) course is designed to provide essential knowledge required and prescribed by OSHA's standard for HAZWOPER. Specific course topics include the following:

- Important and relevant HAZWOPER safety and health issues addressed by OSHA and other organizations for the Annual HAZWOPER.
- Requirements of the OSHA HAZWOPER standard
- Hazardous waste site characterization and control
- Training requirements for workers, managers, supervisors, and teachers
- Employer Health and Safety (EH&S) programs, including organizational structure, site safety plans, safety meetings and inspections
- Medical surveillance programs
- Engineering controls, safe work practices and personal protective equipment (PPE)
- Site and high-risk employee monitoring
- Site decontamination, illumination, and sanitation
- New technology programs
- Requirements of the Resource Conservation and Recovery Act of 1976 (RCRA) for treatment, storage, and disposal (TS&D) facilities
- Hazardous substance release emergencies

- Emergency response plans for hazardous waste operations
- Respirator basics including usage requirements and major types

Elk Environmental Services is partnered with ClickSafety to offer our clients quality online training.
