

Online Confined Space Awareness for General Industry

Intended Audience

Confined Space Awareness for General Industry is designed for all members of the general industry workforce who may be required to perform CSE. These may include employees, supervisors, and managers in the following fields:

- Manufacturing
- Warehousing and distribution
- Property management
- General office
- Trade and transportation
- Hospitality
- Retail services

This course is not intended for employees or employers in the field of construction. If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

Learning Objectives

This confined space awareness training course is based on the Occupational Safety and Health Administration (OSHA) Title 29 CFR 1910.146 standard. It addresses pertinent topics that will help keep you safe during CSE, including:

- Basics of confined spaces
- Confined space awareness
- OSHA's confined space regulations
- CSE permit development and implementation
- Recognition, evaluation, and control of hazards

- Roles of CSE team members, including entrants, attendants, supervisors, and emergency response and rescue personnel
- Emergency response and drills
- Monitoring equipment, personal protective equipment (PPE), and rescue equipment

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
