Online Mold Maintenance Procedures for Supervisors and Managers for Construction

Intended Audience

Mold Maintenance Procedures is online training designed for contractors, building owners and their representatives who have the responsibility to perform mold inspections.

- Construction Contractors
- Building Owners and Their Representatives

Learning Objectives

This mold maintenance safety course will review guidelines for mold maintenance and provide you with a mold maintenance checklist as a reference for performing inspections. This course also teaches ways to foster a healthy work environment by informing the building owner, building management company and contractors of ways to conduct mold maintenance safety.

Course Topics

- Introduction to Mold Maintenance Procedures
- Maryland IAQ Task Force
- Construction Mold Maintenance Committee
- Maintenance Checklist

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
