This course is specifically beneficial for the following industries:

- Construction
- Manufacturing
- Agriculture
- Transportation
- Warehousing & distribution
- Retail services

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

Learning Objectives

The OSHA Heat Illness Prevention for Workers for General Industry online training is an intermediate-level training designed for workers and managers in all industries who may have or have the potential for exposure to heat illness and injury in the workplace. The course is designed to familiarize participants with the basics of heat illness, its symptoms, and how to mitigate risks and the potential for injury.

NOTICE: There are no specific federal standards for heat illness prevention, but the OSHA General Duty Clause (OSH Act of 1975 Sec.5 Duties) mandates that each employer provides a place of employment free from all recognized hazards, including risks associated with heat illness.

This online training is designed to teach participants the proper definitions, causes, symptoms, and ways to mitigate risks associated with heat in the workplace.

Course Topics

- Introduction to heat stress
- Heat illness, background, and associated case studies
- Heat illness symptoms
- The need for water, rest, and shade

Elk Environmental Services is partnered with ClickSafety to offer our clients quality online training.
