

Online Exit Routes, EAP & Fire Prevention Plans for General Industry

Intended Audience

This emergency preparedness planning class is applicable to all employees in the General Industry, especially supervisors and managers who are responsible for workplace safety according to OSHA standards. It is relevant to workers in:

- Construction
- Manufacturing
- Warehousing and Distribution
- Trade and Transportation
- Property Management
- General Office
- Retail Services
- Hospitality
- Healthcare

Learning Objectives

Workplace safety includes knowing how to respond in an emergency. This online Exit Route, EAP and FPP safety course teaches that planning before the emergency occurs is the safest way to deal with an emergency. This course also covers how to design a job site with emergencies in mind, prevent emergencies and create emergency action plans. References for this course include various sections of OSHA regulations found in 29 CFR Part 1910.

Course Topics

- Definitions and Coverage
