

# Online Cadmium Awareness for General Industry

## Intended Audience

The Cadmium Awareness for General Industry course is ideal for all those in the General Industry sector. Individuals who may specifically benefit from this course include the following:

- General industry workers
- General industry managers
- General industry supervisors

If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

## Learning Objectives

The Cadmium Awareness for General Industry online training is designed for all those within the General Industry sector who require training regarding avoidance of this dangerous metal. Participants can expect to discuss sources of Cadmium, as well as signs of exposure, OSHA standards (as established by Subpart Z 29 CFR 1910.1027 for General Industry), as well as overall safety promotion.

This online training is designed to teach workers essential knowledge regarding Cadmium and the dangers associated with it. Participants can expect to discuss common routes of exposure, such as electroplating, removing paint containing cadmium, or exposed batteries. Additionally, participants will learn important signs, symptoms, and exposure response.

## Course Topics

- Introduction to Cadmium
- Properties and exposure to Cadmium
- Safety requirements

Elk Environmental Services is partnered with ClickSafety to offer our clients quality online training.
