

Online Fall Prevention & Protection for General Industry

Intended Audience

This Fall Prevention & Protection for General Industry online course is designed for employees who are either exposed to falls or who must prevent them, including supervisors and managers. All General Industry sectors will benefit, including:

- Manufacturing
- Warehousing and Distribution
- Property Management

Learning Objectives

With this online course, you will become more informed of OSHA's rules and regulations with regard to fall prevention and protection in General Industry and of ways to protect against and prevent falls in the workplace. You will be able to:

- Assess and interpret specific fall prevention and protection regulations as they apply to your organization
- Reference industry standards and best practices
- Identify and address common causes of fall hazards and how to best mitigate them
- Assist in the development and implementation of a comprehensive fall prevention and protection program for your organization

Course Topics

- Walking and working surfaces
- Slip and trip hazards
- Environmental, human, or biological factors affecting fall hazards
- Common fall hazards

- Ladder safety
- OSHA's Fall Prevention Campaign
- Fall prevention vs. fall protection
- Guardrails
- Parapet walls
- Personal fall protection systems
