

Online Focus Four Electrocution Prevention for Construction

Intended Audience

This intermediate-level online course provides electrocution prevention training for all individuals who may work with or be exposed to electricity on construction sites, including:

- Construction workers
- Managers
- Superintendents
- Foremen
- Crew leaders

Additionally, this course would benefit all individuals who are responsible for OSHA safety standards and other safety best practices in the workplace.

Learning Objectives

During this course, students will learn about electrical hazards as part of the OSHA Focus Four Outreach Training initiative, including:

- Basics of electricity
- Common electrical hazards
- Electrocution risks in construction
- Personal Protective Equipment and safety best practices
- Lockout/tagout (LOTO) and energy control procedures
- Electrical work hazard recognition
- How to minimize and avoid electrical risks
- Emergency Response drills and preparation

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
