

Online Portable Fire Extinguishers

Intended Audience

This Portable Fire Extinguisher course is designed for all employees and managers in the General Industry and Construction sectors who are responsible for the safety of their workplace according to OSHA regulations, including those in:

- Manufacturing
- Warehousing and Distribution
- Property Management
- Construction
- Trade and Transportation
- Retail Services
- Healthcare
- Hospitality

Learning Objectives

Fire Extinguisher training is important to minimize the risk of injuries and damage due to workplace fires and explosions. In order to understand how to put out a fire, you will learn the four elements that must be present at the same time in order for a fire to exist. This online course addresses classification of fires, how to use an extinguisher, and how to inspect and conduct maintenance on your extinguisher.

Course Topics

- Portable Fire Extinguishers (PFE)
- PFE Inspection

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
