

Online Respiratory Protection Awareness for General Industry

Intended Audience

Our Respiratory Protection Awareness for General Industry course was designed for all general industry employees, supervisors, and managers in general industry workplaces where respirators are used. Applicable fields include:

- Manufacturing
- Warehousing and distribution
- Property management
- Trade and transportation
- Healthcare

This course is not intended for those who work outside of the general industry workforce. Instead, these professionals can opt to take our Respirator Basics for All Industries Course. If you have any concerns as to whether this course is appropriate for you, please contact us.

Learning Objectives

In this online safety course, participants will learn about the use of respirators in the general industry field. Specifically, it covers topics that include:

- The basics of respiratory protection
- Respirator safety and health
- The Occupational Safety and Health Administration's (OSHA's) respiratory standards, including 29 CFR 1910.134
- United States Pharmacopoeia (USP) air requirements

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
