

# Online Ladder Safety for General Industry

## Intended Audience

This Ladder Safety online course is designed for all General Industry sector employees, including supervisors and managers who are responsible for the safety of their workplace according to OSHA regulations. Any employee who might use a ladder in the workplace should take this course, including those in the following industries:

- Manufacturing
- Warehousing and Distribution
- Property Management
- General Office
- Retail Services
- Hospitality
- Healthcare

## Learning Objectives

Ladder safety training is important to reduce injury from ladder falls and improper use of ladders on the job site. We will provide you with OSHA's requirements for ensuring safety to the highest possible standard in the workplace. When finished with this course, you will have been better informed on the hazards, selection, types, use and maintenance required to reduce the risk of injury from ladder hazards.
