

# Online Control of Hazardous Energy for Construction

## Intended Audience

Control of Hazardous Energy for Construction was designed for members of the construction field, including:

- Workers
- Managers
- Foremen

This course is not intended for members of the general industry workforce. To achieve the appropriate training, these professionals can register for our Control of Hazardous Energy (COHE) Awareness for General Industry course. If you have any concerns as to whether this course is appropriate for you or your industry, please contact us.

## Learning Objectives

Jobs involving hazardous energy carry the potential for workplace accidents, injuries, and even fatalities. To help prevent these occurrences, this course covers several relevant topics, including:

- Hazardous energy basics
- Anticipation, recognition, and evaluation of hazardous energy
- Control of hazardous energy (COHE)
- Lockout/Tagout (LOTO) procedures
- Isolation of hazardous energy
- Zero energy state systems

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
