

# Online Advanced Asbestos Awareness in Schools

## Intended Audience

This asbestos awareness course is designed for custodial and maintenance workers in order to comply with the EPA's program requirements.

- Custodial Workers and Supervisors
- Maintenance Workers and Supervisors
- Electricians
- HVAC Engineers
- Plumbers

## Learning Objectives

This Asbestos Awareness for Schools safety course follows How to Manage Asbestos in School Buildings (EPA), and other EPA, OSHA and State OSHA programs. You must recognize that workers who conduct asbestos abatement operations must be licensed by a State or Federal agency. This is important for your health and the health of others on the job site. You will be informed of the general requirements for working in schools in which Asbestos-containing building materials might be encountered.

This course was designed to meet the annual OSHA (40 CFR 763.92) and AHERA regulatory requirements.

## Course Topics

- Asbestos Basics
- Types of Asbestos
- Asbestos Fibers

- Asbestos Exposure
- Asbestos Containing Materials (ACM)
- ACM Inspection
- Health Effects
- Laws and Regulations
- Avoiding Exposure
