

Online Bloodborne Pathogens Awareness for General Industry

Intended Audience

Bloodborne Pathogens Awareness for General Industry is appropriate for team members who are responsible for maintaining workplace safety per OSHA standards, including employees, team leads, and supervisors. The course is designed for workers in most general industry workplaces, including:

- Manufacturing
- Warehousing and distribution
- Property management
- Retail services
- Healthcare
- Hospitality
- Trade and transportation

For BBP awareness training for construction workers, please see our Bloodborne Pathogens for Construction course.

Learning Objectives

This introductory online course covers important topics in bloodborne pathogen awareness, including:

- Common bloodborne pathogens, including HIV and hepatitis
- Universal exposure and infection prevention precautions per OSHA standards
- Basic decontamination procedures
- The use of personal protective equipment (PPE)

By covering the basics of BBP safety training, Bloodborne Pathogens Awareness for General Industry prepares students to take responsibility for personal safety on the job.

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
