

Online Advanced Asbestos Awareness for Construction

Intended Audience

This online safety course is designed to provide you with asbestos training to satisfy certification requirements. It is intended for all personnel responsible for construction-related projects, including, but not limited to:

- Construction Workers
- Construction Site Supervisors

Learning Objectives

This Asbestos Awareness in Construction online training course focuses on the hazards associated with asbestos. It is important to know that workers who conduct asbestos abatement operations, in most cases, must be licensed by a State or Federal agency. This course provides information from OSHA's Safety and Health Topics-Asbestos, EPA, OSHA, and state OSHA programs.

This course was designed to meet the annual OSHA (1926.1101) and AHERA regulatory requirements.

Course Topics

- Asbestos Basics
- Types of Asbestos
- Asbestos Fibers
- Asbestos Exposure
- Asbestos Containing Materials (ACM)
- ACM Inspection

- Health Effects
- Laws and Regulations
- Avoiding Exposure

Elk Environmental Services is partnered with Clicksafety to offer our clients quality online training.
